

PATENT COOPERATION TREATY

PCT

NOTIFICATION OF ELECTION

(PCT Rule 61.2)

From the INTERNATIONAL BUREAU

To:

Commissioner
US Department of Commerce
United States Patent and Trademark
Office, PCT
2011 South Clark Place Room
CP2/5C24
Arlington, VA 22202
ETATS-UNIS D'AMERIQUE
in its capacity as elected Office

Date of mailing (day/month/year) 14 May 2001 (14.05.01)	
International application No. PCT/EP00/08843	Applicant's or agent's file reference ACD 2731 WO
International filing date (day/month/year) 01 September 2000 (01.09.00)	Priority date (day/month/year) 03 September 1999 (03.09.99)
Applicant JELENIC, Jernej	

1. The designated Office is hereby notified of its election made:

☒ in the demand filed with the International Preliminary Examining Authority on:

22 March 2001 (22.03.01)

☐ in a notice effecting later election filed with the International Bureau on:2. The election ☒ was☐ was not

made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under Rule 32.2(b).

INTERNATIONAL PRELIMINARY EXAMINATION REPORT^{PCT}

(PCT Article 36 and Rule 70)

14

Applicant's or agent's file reference ACD 2731 WO	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/EP00/08843	International filing date (day/month/year) 01/09/2000	Priority date (day/month/year) 03/09/1999
International Patent Classification (IPC) or national classification and IPC C08F8/50		
Applicant AKZO NOBEL N.V. et al.		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 5 sheets, including this cover sheet.

- ☒ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 1 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☒ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 22/03/2001	Date of completion of this report 27.11.2001
Name and mailing address of the international preliminary examining authority:  European Patent Office D-80298 Munich Tel. +49 89 2399 - 0 Tx: 523656 epmu d Fax: +49 89 2399 - 4465	Authorized officer Lux, R Telephone No. +49 89 2399 8593 

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP00/08843

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-18 as originally filed

Claims, pages:

19,21 as originally filed

20 as received on 03/10/2001 with letter of 28/09/2001

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/08843

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims
	No:	Claims 1-11
Inventive step (IS)	Yes:	Claims
	No:	Claims 1-11
Industrial applicability (IA)	Yes:	Claims 1-11
	No:	Claims

2. Citations and explanations
see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

R Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Independent claims 1, 6, 7, and 11 lack novelty and/or inventive step (Art. 33 (2)/(3) PCT) over D1 (FR-A-2 559 774).

D1 describes a process (and the corresponding products) for modifying polyolefins (eg polyethylene) wherein the polyolefin is crosslinked with peroxides (0.1-15 % by weight; cf. claim 6) **in the presence** of a graft copolymer derived from olefins and anhydrides (cf. claim 1).

Although, it is not explicitly mentioned in D1 that the modifying copolymer should also have acid groups, the skilled person knows that these copolymers always have acid functionality to a certain degree depending on the conditions of the polymerisation reaction and/or will produce this functionality during the crosslinking reaction.

The applicants contend (cf. page 8 of the specification) that D1 would show a "different" process or at least a "different" grafting reaction, however, this is not reflected in the wordings of the present claims ie no distinguishing feature can be recognized.

Moreover, compositions containing olefin-copolymers having anhydride and/or acid groups and further containing additives and/or carriers as defined in present claim 11 are well known in the art (see eg EP-A-0 269 274 (D4) and JP-A-08157646 or EP-A-0 429 123 cited on page 3 and page 4 of the present specification) and thus are not new either.

The distinguishing and inventive product feature of a claim drafted in the form of a product-by-process claim (cf. claim 6) should be demonstrated. A product produced by a novel process (which is not the case here) is not necessarily new. The process described in D1 involves crosslinking and therefore these prior art products should also not show blooming of peroxide decomposition products and reduced fogging and emission of volatile matter

The term "containing" introduced into claim 7 does not exclude the presence of a "rubber". Moreover, the broad definition of the polymeric component of claim 7 ("copolymer with olefin-derived moieties and anhydride and/or acid groups") encompasses "rubbers" as well. It is also noted that the "additives", and the carrier materials are optional only. Therefore, claim 7 does not include any distinguishing feature over D1.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/08843

R. Item VII

Certain defects in the international application

The olefin/maleic anhydride copolymer Dapral PX 200[®] used in all Examples seems not to have any **acid** functionality as required by the language of claim 1 and thus seems not to be within the scope of the present invention?

To assist the applicants' understanding, the following explanation is given:

Claim 1 covers two types of copolymers comprising olefin-derived moieties. The expression "and/or" includes a first copolymer having anhydride and acid groups and a second copolymer having acid groups only, ie **both** types have acid functionalities.

EPO - DG

(99)

(meth)acrylic acid, maleic acid, fumaric acid, itaconic acid and/or citraconic acid, preferably from maleic anhydride or methacrylic acid.

6. Products obtainable by the process of any one of the preceding claims.

5

7. Compositions containing:

- 5-60% by weight, based on the total weight of the composition, of one or more peroxides,
 - 0.1-500% by weight, based on the weight of the peroxide(s), of a copolymer with olefin-derived moieties and anhydride and/or acid groups,
 - optional further additives, and
 - 0-50% by weight of a carrier material,
- which are suitable for use in the process of claim 1.

10

15

8. Composition according to claim 7 wherein the copolymer has a molecular weight from 500 to 50,000.

9. Composition according to claim 7 or 8 wherein the copolymer comprises olefinic units derived from propylene, butadiene, isobutylene and/or C₆ to C₂₄ α -olefins, preferably C₁₂ to C₁₈ olefins, and anhydride/acid groups derived from maleic anhydride; (di)alkyl/aryl-maleic anhydride; such as n-dodecylmaleic anhydride, citraconic anhydride, and maleic phenyl anhydride; (substituted) norbornene-2,3-dicarboxylic anhydride; (meth)acrylic acid; maleic acid; fumaric acid; itaconic acid and/or citraconic acid, preferably from maleic anhydride or methacrylic acid.
